

# Solutions to transform Malaysia's education landscape

By [Diyana Isamudin](#) - September 25, 2024 @ 10:37am

Azlan Zainal Abidin - CEO, AwanBiru Technology Berhad

**KUALA LUMPUR:** AWANBIRU Technology Berhad (Awantec) was recognised as the Best Cloud Service Provider for Public Education at the Pikom Digital Excellence Awards 2024 recently.

Established more than 20 years ago, Awantec is a leading enabler of technology and talent digitalisation, offering cloud and talent management services through cutting-edge solutions in partnership with global technology leaders.

Listed on the Main Market of Bursa Malaysia, the company is now led by chief executive officer, Azlan Zainal Abidin, who brings over two decades of experience in managing profitable business-to-business (B2B) companies within systems integration consulting, and telecommunications.

What does winning the Pikom Digital Excellence Awards mean to you and your company?

The award underscores our commitment to advancing Malaysia's digital landscape, particularly in the education sector.

It acknowledges our team's dedication to providing innovative cloud solutions that enable educational institutions to embrace digital advancements.

This recognition also highlights the significance of collaborating with government and industry leaders to deliver secure, scalable cloud solutions for public education.

What do you think about the role of Pikom in building and promoting the tech industry ecosystem?

Pikom plays a crucial role in the tech sector by connecting us with organisations and individuals who share our vision for advancing Malaysia's digital economy.

By championing industry standards and addressing the needs of the tech community, Pikom fosters a strong ecosystem where companies like Awantec can innovate, grow, and significantly impact the nation's digital future.

How have your solutions helped your customers in their business?

Our cloud solutions have profoundly transformed Malaysia's education landscape, especially through our partnerships with the Higher Education Ministry and the Education Ministry.

We have facilitated a smooth transition to digital learning for schools and universities, thereby enhancing the quality of education nationwide.

Additionally, our involvement in a high-performance computing (HPC) project with the National Water Research Institute of Malaysia (Nahrim) supports climate change research and development.

This demonstrates our commitment to leveraging technology to address complex challenges and showcases the versatility and impact of our cloud services.

What are the factors driving cloud services in Malaysia today?

Key drivers for cloud services in Malaysia include the push towards digital transformation, government digitalisation initiatives, and the need for secure, compliant cloud infrastructure.

Awantec is at the forefront of this change, leveraging strategic partnerships and a deep understanding of local needs to provide advanced cloud solutions for businesses and government agencies.

For example, the government's Malaysia Digital Economy Blueprint (MyDigital) has accelerated cloud adoption, and projects like MyGovUC 3.0, which Awantec is involved in, highlight the role of cloudbased solutions in enhancing communication and collaboration among government agencies.
